

Information

SEMAGLUTIDE

Semaglutide is a human-based glucagon-like peptide-1 receptor agonist prescribed as an adjunct to a reduced calorie diet and increased physical activity for chronic weight management in adults with an initial body mass index (BMI) that is considered outside a healthy range.

TIRZEPATIDE

Tirzepatide is a glucose-dependent insulinotropic polypeptide and human-based glucagon-like peptide-1 receptor agonist. It is prescribed as an adjunct to a reduced calorie diet and increased physical activity for chronic weight management in adults with an initial body mass index (BMI) that is considered outside a healthy range.

QUALIFIES

- BMI ≥ 30 kg/ m².
- BMI ≥ 27 kg/m² and a weight-associated comorbidity (eg, dyslipidemia, diabetes mellitus, hypertension).
- Semaglutide: Pediatric 12-17 for Obesity Only: With BMI > 95 percentile.

LIPOTROPIC/B12

These injections can be given with semaglutide/tirzepatide. Lipotropic injections provide a powerful mix of vitamin B-12, amino acids, and enzymes that help you lose weight. This blend of vitamins and nutrients help your body attack fat stores. It can also boost your metabolism to optimize the other aspects of your weight loss treatment plan.

DISQUALIFIES

- Pregnant / Breastfeeding.
- Allergic to this medication.
- History of thyroid nodules / thyroid cancer.
- Gallbladder disease / gallstones (Caution).
- History of pancreatitis (Caution).
- Type 1 Diabetes.
- Mental health disorders / eating disorders.
- Stomach / intestinal problems.
- Vision concerns.
